

WORKING WITH YOUNG ADULTS WHO MISUSE SUBSTANCES A ONE DAY COURSE

A one-day course that seeks to raise awareness of the issues facing service users who use non prescribed street drugs. The course provides an excellent opportunity for inter-agency working and has proved in the past to be particularly effective in raising levels of communication between adolescent and substance misuse services. The programme looks at the difficulties faced by the estimated 50% of young adults who have 'tried' non-prescribed drugs or alcohol on a regular basis and the staff that work with them.

WHO IS THE COURSE FOR?

Social Workers, Voluntary Sector Workers, OTs, Residential Workers, CAMHS, CSWs etc. The course is relevant to all staff working directly with young people either in education or specialist services

SUMMARY OF CONTENT
